

- **Main Menu Options (keep at 5):**
 - Home (explore page which plays the selected 15s of the songs with a video you like - video just for the 15s, not for the entire project)
 - Includes search
 - Rating
 - Profile (this is where you can see your friends)
 - Subcommunities
 - Active Projects - includes:
 - Create new project
 - Sample library - sounds that you've created
 - Rarity system: will be based on rating
- **Creating an account** process (part of this will be music taste)
 - Based on music interests, subcommunities appear that the user can choose between, like Real app
- **Home page**
 - **Search**
 - Search a specific album, genre, artist, or subcommunities
 - See other popular projects
 - filter by subcommunities or explore popular global
 - Audio button on each project that will play the best 15 seconds
 - **Viewing Another Project**
 - Hear unedited sound (full song or small piece)
 - **Rating** (if turned on)
 - Voting page that compares two songs
 - Gain tokens
 - Tokens can earn stylistic details in the app
- **Personal profiles**
 - profile photo and background image
 - music taste: 1-3 genres, top 2-5 artists
 - top three personal creations (song/albums)
 - See Friends
 - "ask to collaborate" button (when users are viewing someone else's profile)
 - **Collaborating** with friends/strangers through their profiles
- **Creating Projects**
 - Refer to [slideshow](#) for settings
- **Publishing Projects**
 - Choose between only friends/public for all
 - Choose subcommunities to see it, or go global with a general subcommunity
 - Sampleable/not
 - Auto grading
 - Peer-reviews
 - Voting; if the user approves voting then they must select their favorite 15 seconds of the song to be displayed
